Schluter®-KERDI-FIX

INNOVATIVE SOLUTIONS FOR CERAMIC AND STONE TILE

SEALING AND BONDING COMPOUND

Application and Function

8.3 Schluter®-KERDI-FIX is a single-component, waterproof sealing and bonding compound with a silane-modified polymer base. KERDI-FIX can be used to waterproof pipe and valve protrusions in the Schluter®-Shower System in conjunction with the Schluter®-KERDI membrane and Schluter®-KERDI-BOARD. KERDI-FIX is required to bond the KERDI membrane to the stainless steel Schluter®-KERDI-DRAIN bonding flange and can be used to bond KERDI to building elements such as bathtubs, window elements, and door frames. KERDI-BOARD can be adhered with KERDI-FIX in various applications, such as countertops, partitions, and other building elements.

Material Properties and Areas of Application

KERDI-FIX is odorless, weather- and UV-resistant. The product is elastomeric, free of solvents, and provides a strong bond to most materials, including wood, stone, concrete, metal, glass, and many synthetic materials. KERDI-FIX can be painted over with most alkyd resins or dispersion paint types. The suitability of the material must be verified based on the anticipated chemical, mechanical, and/or other stresses. KERDI-FIX is not recommended in or around swimming pool applications.

KERDI-FIX has been evaluated according to the "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers, Version 1.1" for California Specification 01350 and found to comply with the VOC requirements. California Specification 01350 is referenced by various green building standards and rating systems.

Installation

Bonding KERDI membrane

1. The surface where KERDI-FIX is to be applied must be clean and free of grease or other contaminants prior to KERDI-FIX application.
2. Apply KERDI-FIX to the substrate and spread evenly with an appropriate notched trowel.
3. Embed the KERDI in the KERDI-FIX and work the membrane onto the substrate to ensure full coverage and remove air pockets.
4. Remove fresh KERDI-FIX with a cleaning agent (e.g., mineral spirits); after any excess KERDI-FIX has set, it can only be removed with mechanical methods.

Maintenance

Unopened packages of KERDI-FIX can be stored in a cool location that is above freezing temperatures for up to 18 months. Once the cartridge has been opened, the material has a limited shelf life.
