Alpha® Dry Blades may also be used wet providing the specified RPM is maintained. However, Alpha® Wet Blades may not be used dry with exception of the Alpha® Sonic (part numbers TS04AL and TS05AL). In all cases, it is important that the application meet the defined use for that specific blade. Different sizes are available for various applications. Please refer to the specific page number to determine which sizes are available.

ALPHA® ECOGUARD DUST COLLECTION COVERS

For Cutting & Grinding Applications

A VIRTUALLY DUST-FREE SOLUTION!

mesh removal

ECOGUARD TYPE G

The EcoGuard Type G is intended for use when grinding with wheels up to 5" in diameter. It is made of high-quality construction for heavy-duty applications. This dust collection cover creates a virtually dust-free environment when connected to a vacuum.

Products used:

curve cutting

ECOGUARD TYPE W

The EcoGuard Type W is a dust collection cover for wider blades. Unlike the EcoGuard Type C which uses a supplied dust collection bag, the EcoGuard Type W must be used with a vacuum, or other dust collection system, to successfully collect the dust and larger particles derived from using wider kerf diamond blades such as the Alpha® Contour, Tuck Pointing or Crack Chasing blades.

Products used:

straight cut

ECOGUARD TYPE C

The EcoGuard Type C is for use when cutting with dry blades up to 5" in diameter. It is made of high-quality construction for heavy-duty applications. This hybrid dust collection cover eliminates the mess and can be used with or without a vacuum!

Products used:
