

INSTANT CLEANER FOR FRESH HYBRID & EPOXY GROUT

HYBRID & EPOXY PRO

PORCELAIN AND CERAMIC TILE, GLASS MOSAIC, QUARRY TILE

- **SAFE FOR THE INSTALLER AND THE ENVIRONMENT.**
- **ALSO IDEAL FOR CLEANING GROUTING TOOLS.**

WHAT IT'S FOR

- Eliminates fresh epoxy, urethane and pre-mixed/hybrid grout residue during installation, before it cures.
- Perfect for cleaning grouting tools after installation.

ADVANTAGES

- **RAPIDDRY TECHNOLOGY:** dries quickly, to be used during installation.
- Gel-like consistency: the formula can be easily applied to vertical surfaces.
- Does not damage grout joints.
- Does not damage or corrode aluminum and steel trims.
- Safe for the installer and the environment: does not emit harmful fumes.
- Does not foam, no rising necessary.
- Use indoors and outdoors, ideal for floors and vertical surfaces.

HOW TO USE IT

Ready to use.

Spray **HYBRID & EPOXY PRO** evenly on the surface. Let sit for up to 3 minutes. Wipe with a white pad without applying too much pressure, then rinse thoroughly. If cleaning takes place a few hours after grouting, let the product sit on the surface for about 20 minutes.

Caution: Do not use on absorbent materials such as absorbent stone, wood and methacrylate. Test the product before use to determine the material's resistance and the dwell time required for the product to reach maximum effectiveness. Safety data sheet available upon request.

Storage temperature: between 41°F and 86°F (5°C and 30°C).
Must be applied at temperatures between 41°F and 86°F (5°C and 30°C).
