

iQ POWER TOOLS

iQTS244™

Cut Tile With No Water.

**The precision and versatility
of a wet saw. *Dry.***

**Eliminating water from your cutting is smart:
save the mess, save the hassle, save money.**

POWER TOOLS™

No Dust. No Water. No Problem.

World's First Dry Cut Tile Saw With Integrated Dust Control

No Water. No Mess. No Problem.

The iQTS244™ is a 10" dry cut tile saw for professional contractors, designed to eliminate problems with cutting wet, save time, and increase your profitability on tile jobs.

With fully-integrated dust collection technology, this innovative tool allows you to cut tile inside or outside with no water and no dust.

Vacuum System

- 92 CFM high output vacuum
- Saw automatically starts vacuum
- Cyclone technology tested to capture over 99.5% of dust

Filter System

- Three-stage filtration
- Quick-Spin® filter for easy cleaning
- 11 sq ft iQ Dura Bond filter

Dust Containment

- Empty dust tray once a day
- Easy cleanup and recycling
- Meets OSHA's 2017 silica standard

**Patent Pending*

*** Stand sold separately*

Cool To The Touch

How does it cut dry without water?

With our Q-Drive™ Blade with Cool Cut Technology.

Through years of experience and testing, we have perfected our proprietary blade with the perfect ratio of high diamond to metal powder concentration. Our Cool Cut Technology, combined with the built-in vacuum on the iQTS244™, keeps the blade cool while cutting.

While cooling, the vacuum also removes the cutting debris so the blade is not regrinding the same material, reducing friction and heat.

- Blade stays cool to the touch
- No warping or wandering
- Precision cuts match the quality of a wet blade

ARE YOU READY TO GIVE UP THE WATER?

Cutting With Water Is A Pain

Water was once the go-to solution for cutting tile, but it's a pain to deal with and causes problems that cost you money:

- Increases your setup time
- Water source, buckets and spray guards
- Makes a mess that has to be cleaned up
- Prohibits cutting in many locations
- Disposal of slurry & contaminated water

Cutting Dry: A Game-Changer

Cutting dry will change your cutting operation, making your business more profitable:

- No hoses, buckets or tarps to set up
- Cut right at the work area no matter the size
- Operator stays dry, no splashback, no mess
- Tiles stay dry, lay cuts immediately
- No slurry cleanup, no water disposal

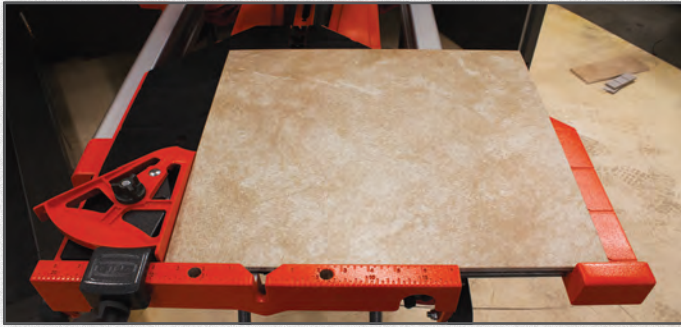

POWER TOOLS™

No Dust. No Water. No Problem.

The Versatility You Demand

Cut ceramic, porcelain, marble and stone. 10" blade capable of 24" rip cuts and 18" diagonal cuts, with a cutting depth of 1".

Specifications

- VOLTAGE:** 120v
- TOTAL SYSTEM AMPERAGE:** 17amps
- SAW MOTOR POWER:** 1.5hp/12amps
- VAC MOTOR POWER:** .8hp/5amps
- VACUUM CFM:** 92
- SAW WEIGHT:** 93lbs
- SAW DIMENSIONS:** 27" w × 34" l × 28" h
- STAND DIMENSIONS:** 18" w × 28" l × 20" h
- BLADE SIZE:** Q-Drive 10" Blade
- FILTER TYPE:** iQ Dura Bond Cartridge
- RIP CUT CAPACITY:** 24"
- DIAGONAL CUT CAPACITY:** 18"
- CUTTING DEPTH:** 1"
- DUST CAPACITY:** 11 lbs. or over 500 L.F. of cutting 3/8" thick

Construction-Grade Toughness

We understand construction and the stress it puts on your tools. The iQTS244™ is built for the demands of everyday construction and a heavy workload, it's easy to maintain and will last for years.

- High impact materials
- 1-year limited warranty
- Over 100,000 cuts in testing

Portability Like No Other Tile Saw

This tool is designed for efficiency and not just cutting.

- Set up in small spaces
- Easy to transport
- No water source required, or water disposal
