

NATURAL LOOK PENETRATING SEALER

MP90

ALL NATURAL STONE, ENGINEERED QUARTZ,
POLISHED PORCELAIN, GROUT

**SOLVENT
TECHNOLOGY**

WHAT IT'S FOR

- Effectively seals and protects all stone and polished porcelain tile against stains.
- Ideal protection for polished kitchen countertops and bathroom vanities.
- Perfect for tables and windowsills.
- Suitable for the protection of crackle tile.
- Makes everyday maintenance easy.

ADVANTAGES

- Does not form a film or discolor over time.
- Treated surfaces are safe for food contact.
- Does not alter the natural look of the surface.
- PFOA free: non carcinogenic.

HOW TO USE IT

READY TO USE, no dilution necessary. On a dry and clean surface, apply an even, generous coat of **MP90** with a paintbrush or lambswool applicator. Let sit for 10 minutes, then wipe and rub the surface to allow any excess product to completely penetrate or be removed. The surface may be used for normal foot traffic after 8 hours. Full cure and maximum sealer protection is achieved in 24 hours.

Caution: Before full application, test the product on a small, inconspicuous area of the surface (especially on highly absorbent materials) or loose sample to check for any discoloration. Apply and leave the product to dry in a well ventilated area. **MP90** does not protect marble, travertine and limestone from acid stains.

Storage temperature: Between 32°F and 86°F (0°C and 30°C). Must be applied at temperatures between 41°F and 86°F (5°C and 30°C).

DEEP PENETRATION.

PERFECT FOR FOOD PREPARATION SURFACES.

Working Properties:

Surface Traffic = 8 hours
Full Cure = 24 hours

Coverage:

1 QT (0.95 L)
Polished stone ›
305 sq.ft. (28 m²)
Polished porcelain tile ›
305-405 sq.ft. (28-38 m²)
Natural finish stone ›
100-200 sq.ft. (9-19 m²)

Coverage rates are indicative and per coat.

Packaging:

1 GAL (3.78 L): 4 plastic bottles per box
1 QT (946 ml) 6 plastic bottles per box
1 PT (473 ml) 12 plastic bottles per box
