

PENETRATING STONE ENHANCER

STONE PLUS

ALL NATURAL STONE

SOLVENT TECHNOLOGY

- **MATTE FINISH COLOR ENHANCER.**
- **UV RESISTANT AND NON YELLOWING.**

WHAT IT'S FOR

- Enriches the color of polished, honed, textured and tumbled natural stone.
- Highlights the natural surface character.
- Protects the surface from dirt, water and oil stains.
- Enhances and intensifies the stone's natural color with a matte finish.
- Excellent protection for countertops, inlays and backsplashes.
- Hides cracks on granite surfaces.

ADVANTAGES

- Ideal for indoor and outdoor surfaces.
- Does not form a film or yellow over time.
- UV resistant.
- Long lasting protection.
- Certified safe in food preparation areas.
- Provides very high coverage rates.

HOW TO USE IT

Ready to use, no dilution necessary.

Apply **STONE PLUS** to a clean, dry surface using a paintbrush or other suitable applicator. Rub the surface to allow the product to completely penetrate and wipe away any excess residue. The surface can be walked on after 8 hours. For deeper, more intense color, apply 2-3 coats; wait at least 8 hours between coats.

Caution: Once the surface has been treated with **STONE PLUS**, the treatment cannot be reversed; the stone cannot return to its original state. Before full application, test the product on a small, inconspicuous area or loose sample. Apply and leave the product to dry in a well ventilated area. Keep the product in a cool, dry place.

Storage temperature: Between 32°F and 86°F (0°C and 30°C). Must be applied at temperatures between 41°F and 86°F (5°C and 30°C).

Coverage:

1 QT (0.95 L)

Polished stone ▶ 407 sq.ft. (37 m²)

Natural finish stone ▶ 200-255 sq.ft. (19-24 m²)

Coverage rates are indicative and per coat.

Packaging:

1 PT (473 ml) 12 plastic bottles per box

1 QT (946 ml) 6 plastic bottles per box
